ABOUT ME

I'm a Computer Science graduate with 2.5 years of hands-on experience in Android development, specializing in Kotlin, native Android, Jetpack Compose, and MVVM architecture. As a Bangkit Academy 2023 graduate and Dicoding-certified Android Developer, I build scalable, maintainable, user-focused apps with clean and testable code. With a strong growth mindset and adaptability, I thrive in collaborative teams and enjoy solving real-world problems through efficient, high-quality code.

EDUCATION LEVEL

Universitas Kristen Duta Wacana - Yogyakarta, Indonesia

Sep 2020 - Sep 2024

Bachelor of Computer Science - 3.92 GPA

- Awarded a full scholarship through the 2019 Online Scholarship Competition (OSC) supported by Metro Group.
- Ranked among the top students with the highest GPA during the 2020/2021 and 2021/2022 academic semesters in the Informatics Study Program, Faculty of Information Technology.
- Semifinalist in the Competitive Programming Competition at Atma Jaya Yogyakarta University, 2021.
- Graduated as the top student (highest GPA) in the Informatics Study Program at the university's November 2024 commencement.

EXPERIENCE

Assistant Lecturer, Universitas Kristen Duta Wacana

Aug 2022 – Jan 2024

- Yogyakarta, Indonesia

Lecturer Assistant

- Delivered lab sessions for 30+ students in Programming Algorithms, Data Structures, and Android Programming, teaching practical skills in algorithms, OOP (Python, Visual Studio Code), and Android app development (Kotlin, Android Studio).
- Providing guidance and assistance to students as they work on lab assignments and project.
- Assessing and grading students' lab work, projects, and assignments.

PROFESSIONAL DEVELOPMENT

Bangkit Academy 2023, Kampus Merdeka x Google -

Feb 2023 – Jun 2023

Indonesia

Android Development Path

- Completed intensive Android development training, including Dicoding courses on Kotlin, Jetpack Compose, Android fundamentals, intermediate Android, SOLID principles, and UX design.
- Developed an MSME Discovery App as a capstone project in a cross-functional team (Android, Cloud, ML).
- Built key features using MVVM, Geo Location, and Retrofit to enable personalized recommendations and cloud-based storage.

CERTIFICATIONS

Developer Certification for Android (DCA) -
Dicoding
Credentials : <https://dev.id/certificate/verify/ZEV6QX4VYL>

Valid Through: Jan 2025 – Jan 2028

SKILLS

Technical Skills • Programming & Frameworks: Kotlin, Android Native, Jetpack Compose, MySQL, REST API, Reactive Programming (Coroutines), Background Thread & Scheduler • Architecture & Design: MVVM, Clean Architecture, Modularization, SOLID Principles, Dependency Injection (Hilt) • Android Libraries & Tools: Jetpack Components, Room, Firebase (Auth, Realtime DB, FCM), Soundpool, MediaPlayer, ExoPlayer, CI/CD (GitHub Actions, etc.) • Testing & Optimization: Advanced Testing, Performance Debugging, Animation, Localization & Accessibility	Soft Skills • Collaboration • Problem-Solving • Adaptability • Mentoring • Communication

ORGANISATIONAL EXPERIENCE

OSC Community - Indonesia <i>Content Writer</i> • Conducting thorough research to gather accurate and up-to-date information. • Incorporating keywords and following SEO guidelines to enhance article visibility online. • Writing in a style that resonates with the target audience and maintains their interest.	Jan 2022 - Dec 2022
Rector Cup 2022 - Universitas Kristen Duta Wacana <i>Human Resource Division</i> • The committee was responsible for organizing and executing a campus-wide sports event to celebrate the university's anniversary. • Recruited and coordinated a team of volunteers to assist with various event activities, ensuring proper allocation of tasks and roles.	Sep 2022 - Oct 2022
FTI+ 2022 - Universitas Kristen Duta Wacana <i>Human Resource Division</i> • A community-building event designed to welcome and connect new students in the Faculty of Informatics. • Coordinated the transportation, setup, and teardown of event equipment, ensuring smooth operations during the event. • Oversaw the inventory and maintenance of all event-related equipment, ensuring everything was in good working condition and ready for use.	Nov 2022 - Dec 2022

PROJECT

- **KuToko – AI-Integrated MSME Discovery App (2023)** : Developed an Android app using Kotlin, MVVM, Jetpack Compose, and Retrofit, integrating ML-based recommendations and Google Maps API with AI/cloud team collaboration.
- **BearBull – Portfolio Management (2025)** : - Developed an offline Android app using Kotlin, MVVM, ROOM, and Dagger-Hilt, enabling transaction logging, profit/loss trends, and portfolio updates via WorkManager.
